xRuler Pro - Professional Unity Editor Measurement Tool

Core Features

- **Distance Measurement: Measure distances between any two points in your scene**
- **Bounding Box Display: View object dimensions with color-coded axes (X/Y/Z)**
- **Reference Object Preview: Toggle a reference cube to visualize scale**
- **Multiple Unit Systems: Support for mm, cm, m, km, feet, and inches**
- **Real-time Feedback: Live measurement updates as you move the mouse**
- **Zero Performance Impact: Optimized for no allocations during measurement**

xRuler Pro Controls

- **Shift + R - Activate measurement mode**
- **Left Click - Set measurement points (first click = start, second = end, third = new measurement)**
- **Click Object - Display bounding box with X/Y/Z dimensions**
- **Scroll Wheel - Toggle reference cube preview**
- **Esc - Exit measurement mode**
- **Tools > xRuler Pro Manager - Open settings (units, colors, sizes)**
